

CANADIAN WOLLASTONITE

A WHITE MINERAL FOR A GREEN WORLD

WOLLASTONITE

THE EASY WAY TO GROW HEALTHIER GARDENS, LAWNS & TREES

- ✔ Protects plants from climate extremes
- ✔ Improves yield, colour, and flavour
- ✔ Reduces disease and pests
- ✔ Less watering

APPLICATION INSTRUCTIONS:

- ✔ Spread annually by hand, scoop or shovel in spring, summer or fall. Use the higher application range for problem areas. Wollastonite will not burn plants.
- ✔ Individual Plants - apply 1 to 2 cups per 1m² around base of plant
- ✔ Lawns, Gardens & Trees - spread 2-4kg/10m² (4-9lbs /100ft²)
- ✔ 20kg treats up to 100m² (1,000ft²)

GUARANTEED ANALYSIS

Silicon (Si)	27%	Sulphur (S)	0.75%
Calcium (Ca)	14%	Iron (Fe)	1.8%
Magnesium (Mg)	4%	Copper* (Cu)	30 ppm
Total Nitrogen (N)	0.11%	Manganese (Mn)	327 ppm
Soluble Potash (K2O)	0.10%	Zinc* (Zn)	21 ppm

* This soil amendment contains copper and zinc and should be used only as recommended. It may prove harmful when misused. Wollastonite should be used as part of a complete fertilizer program. Total annual application should not exceed an equivalent of 80 kg per 100m² (8000 kg/ha.). Excessive exposure to dust may irritate eyes and respiratory system. Wear eye protection and gloves and handle in a well ventilated area. Refer to SDS for further information. Annual application in spring or fall is ideal.
